## FIRST AID AND EMERGENCY CARE

By Roger W. Gfeller, DVM, DipACVECC, Michael W. Thomas, DVM, and Isaac Mayo Authors

Preparing for a medical emergency involving your pet is always best accomplished before the event takes place. This series is designed to help guide you through the important decisions about first aid, as well as how and when to transport your pet quickly and safely to a veterinary hospital or emergency facility.

VeterinaryPartner.com has provided this complete reference book online for you to browse through, expanding your knowledge of dog and cat first aid; however, we encourage you to buy the book to keep in your home or car as a quick reference during an emergency.

This book is an emergency preparedness ready-reference for dogs and cats. Wise preventive measures, intelligent use of first aid principles, coupled with recognition of abnormal symptoms and treatment of disorders, diseases, and problems, lead to effective health care.

A working knowledge of this information will help you eliminate some potentially dangerous circumstances and help you prepare for emergency situations.

It includes information on what to do and what not to do in specific emergency situations.

The authors encourage careful reading and occasional rereading. We have

tried to make this book easy to understand, avoiding technical terms as often as possible, but defining them in context when they are necessary.
